+ Postage & Package

Routine use of disinfectant means regular exposure to potentially harmful chemicals. Is your disinfectant kind to those in your care, the environment and you?

H1N1 APPROVED FROM DEFRA SEE ATTACHED CERTIFICATE

Most professionals who try OUR Disinfectant Cleaner say they prefer it because;

- It does **NOT** contain harmful Phenols, Aldehydes or Alcohol.
- It is **NON-toxic, NON-corrosive, NON-staining, NON-tainting** and a **NON-irritant** at all recommended dilutions.
- Working dilutions has **neutral pH** of approximately 7.6.
- There is no need to wash away with water after application and can be immediately brought into direct contact with humans and animals whilst still wet **saving you valuable time** which can be better spent caring.
- It is kind to the environment being water based and **biodegradable**

Kind Regards
